

Master in Photonics – "PHOTONICS BCN" ERASMUS+ "EUROPHOTONICS"

MASTER THESIS PROPOSAL

Dates: April - September 2020

Laboratory: ENPHOCAT: ENergy, PHOtonics & CATalisys

Institution: Universitat de Barcelona City, Country: Barcelona. Spain

Title of the master thesis: PHOTOLUMINESCENCE PROPERTIES OF

ZnO/GRAPHENE NANOMATERIALS

Name of the master thesis supervisor: Frank Güell

Email address: frank@el.ub.edu Phone number: 93.4039166

Mail address: C/Martí i Franquès 1, 08028 Barcelona

Keywords: Nanomaterials, Nanotechnolgy, ZnO, Graphene, Photoluminescence.

Summary of the subject (maximum 1 page): This project is based on the development of advanced nanomaterials that hold the key to open a new generation of products for clean, renewable and sustainable energy. These breakthroughs will be reached through the control of material properties and understanding of mechanisms and phenomena at the nanoscale and atomic level. Photoluminescent ZnO/Graphene nanomaterials are an emerging class of nanomaterials with unique optical properties. They each, ZnO and carbon nanomaterials, have an advantage of being nontoxic and environmentally friendly. Moreover, ZnO presents photoluminescence emission in the UV and visible region depending on the synthesis routes, shape, size, deep level, and surface defects. When combined with carbon nanomaterials, modification of surface defects in ZnO allows tuning of these photoluminescence properties to produce, for example, white light.
